AHSAY™

v6 Sunset Edition
Enjoy final hotfixes and extended support at half price

In order to provide the best software and product support for our partners, Ahsay must periodically retire older versions of the software. This enables us to dedicate all our resources in delivering the latest features, enhancements and support to our current version.

v6 Sunset Edition is the final version of v6, offering partners final hotfixes, extended support and an interim step towards upgrading to v7.

v6 will sunset and retire on Dec 31st, 2018

1. Why v6 Sunset Edition is for you

‣ Final software hotfixes that extend the life of v6 while you plan for v7 upgrade

‣ Lower cost to get maintenance support for running business and access to the License Management Portal (LMP)

‣ Product stability is more important than new features in v7

2. What it takes

50% of the standard maintenance fee to Dec 31st, 2018

3. Use case

PROS

✓ Offer proven product stability and reliability

✓ Serve v6 customers better with hotfixes and continued access to LMP

✓ Keep business running smoothly with extended v6 support at only half price of the standard maintenance

✓ Provide more buffer time to evaluate v7 and an interim step for future upgrade

CONS

✗ Only get best effort support for platforms that reached their end of support, e.g. Windows XP, Windows Vista, Windows Server 2003

✗ Cannot reach out to new customer bases utilizing new features in v7, e.g. Office 365 Exchange Online Mailbox backup, VM Run Direct, faster backup, restore and replication

✗ Require settlement of upgrade fee for future v7 upgrade
